**Fit & FORGET,**  
**NOT Fit & REGRET!**  
*Your One Stop EFI Shop!*

## AIR SYSTEM DIAGNOSIS

Designed to help you with timely diagnosis of most components associated with the Air System. Also covered, will be common issues on problematic components associated to vehicle makes and models.

Training will cover: Air Flow Meters, Air Control Valves, Sensors and Emission Control. You will also receive a 60 page workbook and Certificate of Course Attendance, both being a valuable asset in the workplace.

Management at AFI have come from the workshop floor, and understand the difficulties you face in an ever changing and complex industry. AFI training has been structured to benefit you and your business, hoping save you time as well as money.

Pre-Registration is required to receive a Training Pack.

## DIAGNOSTICS USING SCAN TOOLS

Bill Mahony from Launch Tech Victoria has kindly agreed to give IAME members and guests an overview on how to get the best out of scan tools.

Bill will comprehensively cover what the data actually means as well as what can and can't be trusted when accessing fault codes on a wide variety of vehicles.

Don't miss this excellent insight into what makes scan tools tick!

Limited numbers so please make sure you book early!
